

# MEYLE-HD: Better than OE!

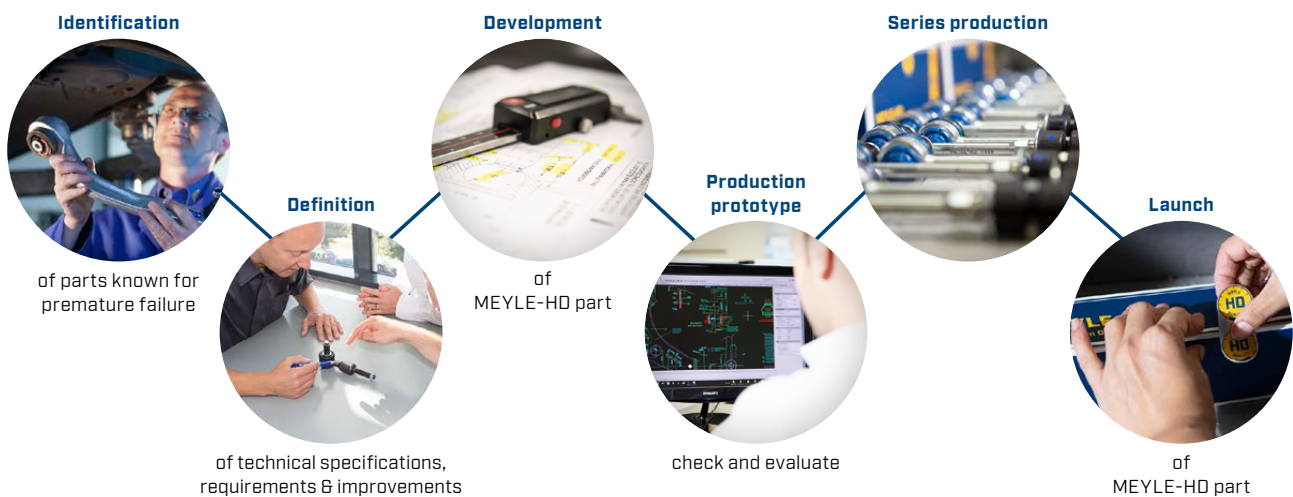

An increasing number of recalls, poorly conceived technology in the vehicle and in the installed production parts, and complicated installation and removal – these often lead to anger and frustration for workshop employees and drivers!

MEYLE does it better: MEYLE-HD products are technically superior to the OE part, whilst the reinforced and optimised design and high-quality materials make them more durable and reliable – as a result, they simply last longer and often outperform OE parts. MEYLE engineers analyse these OE parts, their

weaknesses and potential for improvement, use their findings to develop better parts, and are involved in the entire process, from development to manufacturing at our own production facilities or at those of our international production partners.

### MEYLE-HD – simply impressive:

- Designed for a long service life: top-quality car parts which are technically superior to the OE part.
- Engineered and quality approved in Germany: multi-level re-engineering process by MEYLE experts
- 4 years warranty on all MEYLE-HD parts\*
